Following the publication of the original article [1], the second panel of Fig. 1A was amended, and now shows the correct GFP fluorescence histogram (time point: after 2 h, condition: \emptyset Ara).

Figure 1A has been solely used to visualize the flow cytometry data, thus the Figure legend remains unchanged.

This correction does not affect any analysis included in the published article, the reported results, or the interpretation of the results.

The original article has been corrected.
